

OUR TUNISIAN PROJECT

In this project, **MAECOLUX S.A** has supplied thanks to **Medsupply** dental equipments to the Delegation of the European Union in Tunisia to enable the Tunisian Ministry of Health to equip or complete the equipment of nearly

200 dental practices in 13 different regions.

Thanks to our manufacturing partners, we have been able to realize this magnificent project which has come to fruition during the year 2021.

File with high technology products and with a complex logistics:
installations carried out in almost **200 sites** distributed in **13 regions** of Tunisia and of which here are some key figures :

13x complete chairs for specific need (with chair, mobile cart, ceiling scialytic, compressor, surgical suction engine, high-end rotary instrumentation ...)

13x complete mobile dental units (with mobile dental chair «Denta Chair 303», LED operating lamp, carrying case for lamps, boards, stands, dental stool, portable dental unit «Smart Port», high-end rotary instrumentation...)

169x wall-mounted dental X-rays with high frequency generator.

7x complete dental laboratories (with 2-station prosthesis workbenches, polishers, polymerizer, retouching engine, plaster cutter, press, vibrator, various accessories...)

Nearly 150 high-end rotary instruments (light, internal spray ...)

MAECOLUX and Medsupply: at the service of oral health in Tunisia
