

# DENTAL SCHOOLS INSTALLATIONS

# Our Engagements

Our team at **MAECOLUX SA**, was founded around :

a dentist and consultant having worked in Africa for more than 10 years, endowed with a deep awareness of socio-economic concerns locally.  
an engineer with a 12-year experience in managing projects and international trades, especially towards developing countries.

Benefiting from the expertise and the convictions of its founders, our team has been firmly committed for almost 15 years to promoting and developing dental healthcare throughout Africa.

Besides bringing our support to the continuing education program of the World Dental Federation, which aims at improving oral health policies and dental education worldwide, we made a point of promoting and easing access for African people to oral healthcare and superior education in odontology.

With this in view, MAECOLUX SA has developed complete turnkey solutions, including counseling, logistics, installation, maintenance and training, in order to meet the specific needs of practitioners and educational institutions optimally.

Furthermore, we distribute a range of dental consumables inspired by nature (which we have contributed to develop) that provides dentists with economical, modern and highly efficient dental care solutions.

Our commitments and our actions have allowed us to assist universities, hospitals, dental clinics (private and public) in their refurbishment projects, and enable us to support them durably while developing their activity.

To achieve this, our team made a commitment to maintain proximity, availability as well as a regular, volunteer and transparent communication with our partners, with the will of developing stable and sustainable relationships.

MAECOLUX SA and its entire team thank you for your confidence and are proud to introduce you to our brand new book displaying our projects and achievements.

*Jean-Pierre EUDIER and Stanislas EUDIER co-founders of MAECOLUX SA*
